Custom Automation Solution Specialists

Radco Industries will work closely with you to create, design, and build the custom machinery you need for your business. We can help you clarify design requirements, build the system and install it in your plant.

We are industry leaders in:

- **Robotics Integration** – Part Inspection, Sorting, Racking, and Assembly
- **Custom Machinery** – Design and build special machines using unique creative concepts tailored to your needs.
- **Part Inspection** - We can provide solutions for inspection requirements and automate your process to minimize your production costs.
- **Leak Testing** – Our diverse experience in leak testing technology enables us to meet your specific requirements.
- **Gasket Dispense** – Robotic form-in-place gasketing systems to meet wide configuration of parts.
- **Load/Unload Machines** – Past applications range from flexible robotic solutions to fixed hard automation.

Robotic Load/Unload

Robotic Form-in-Place Gasketing
